

I. Learning Task

MODIFIED TRUE OR FALSE: Write TRUE in columns A and B if the statement is correct. If it is incorrect write FALSE in column A, then encircle the word/s that make/s it incorrect, finally write the correct **word/s** in column B. (2 pts each)

A	B	STATEMENTS
TRUE	TRUE	1. Seminiferous tubules are where the sperm form and produce.
FALSE	<u>Ovary</u>	2. <u>Cervix</u> is the primary part of the female reproductive system.
True	True	3. Testicle is the primary part of the male reproductive system.
False	Endocrine glands	4. <u>Reproductive system</u> controls the release of your body hormones.
False	Adrenal	5. <u>Adrenaline</u> gland causes the adrenaline rush.
False	Blood	6. Erection of the penis is caused by the <u>water</u> that flows in the erectile tissue.
True	True	7. Scrotum expands when it is cold.
False	Fallopian tube	8. <u>Ovary</u> is where the egg cell and sperm cell meet or unite to form zygote.
False	pituitary gland	9. <u>Thyroid gland</u> is the master gland of the endocrine system.
False	3.1 °C (5.6 °F)	10. The scrotum has a temperature of about <u>35 F</u> (the rest of the body is usually 98.6F)

Answer the following concisely.

- Why are the testes located in the scrotum?
- To maintain testicular temperature at several degrees below core body temperature
- Using the following terms, trace the pathway of sperm from the testes to the urethra: testis, epididymis, seminiferous tubule, vas deferens.
(1) Seminiferous tubule (2) epididymis (3) vas deferens (4) testis
- Assume a couple has just consummated the sex act and the man's sperm have been deposited in the woman's vagina. Trace the pathway of the sperm through the female reproductive tract.
(1) vagina (2) Cervix (3) cavity of uterus (4) fallopian tubes

I. Learning Task

MAKE YOUR STAND

Instruction: Identify and describe the stand of church, government and your stand regarding the use of assisted reproductive technology or artificial method of reproduction. Fill in the table below.

<u>Church</u>	<u>Government</u>	<u>MY STAND</u>
<p>According to traditional Christian views, beginning at conception, the embryo has moral status as a human being, and thus most assisted reproductive technologies are forbidden. According to Islam, the procedures of IVF and embryo transfer are acceptable, although they can be performed only for husband and wife. Developments in science and technology and corresponding clinical applications raise new religious questions, often without clear answers.</p> <p>Reference: https://pubmed.ncbi.nlm.nih.gov/15820035/</p>	<p>The federal and state governments have also passed laws regarding certain aspects of ART. For example, federal law and several state laws prohibit cloning a human; compensating a gestational carrier is prohibited in Michigan; and cryopreservation is limited in Louisiana. New York State requires licensure of ART laboratories, and California requires a provisional license</p> <p>Reference: https://www.fertstert.org/article/S0015-0282(02)04199-7/fulltext</p>	<p>My stand about the use of assisted reproductive technology or artificial method of reproduction is neutral, I cannot say that I am against it and also agree with it, but I choose to be neutral, for me it is okay when the other person cannot reproduce or can't have kids, but I also disagree to this when this becomes business, or become experimental or trials and errors, because there is life involves.</p>

Situational Essay: Answer the Following question based on your knowledge and perception of the concept.

1. If in any chance you have this infertility issue, would you resort to trying this assisted reproductive technology? (Explain)
No, even though I am neutral with this, I consider this as immoral in the sight of God, or spiritually unclean.
2. Of all concerns relating to ART, do you think that this could be of any help to those facing this problem of fertility issues?

Republic of the Philippines
City of Olongapo
GORDON COLLEGE
